# Joshua Onyejiekwe

240-413-7270 | joshuaonyejiekwe12@gmail.com | Linkedin | GitHub

## Education

**Morgan State University** Expected May 2028
*B.S. Computer Science* *Baltimore, MD*

## Experience

**Fearless | Software Engineering Intern** Jun. 2026 – Aug. 2026
*Maryland FAMLI Paid Family Leave Application* *Baltimore, MD*

- Built and tested a custom Ruby on Rails validation with RSpec to reject improperly formatted birthdates and dates indicating an age above 120, improving worker-profile data quality.
- Implemented and tested a Rails validation that limits each worker profile to one physical and one mailing address, preventing duplicate address records and strengthening data integrity.
- Standardized eligibility-checker terminology across English and Spanish localization files to keep translated text consistent throughout the application.
- Collaborated with engineers through Git-based pull requests and code reviews to test, refine, and deliver updates to a production application.

**CECE Lab** Jan. 2025 – Jun. 2025
*Teaching Assistant* *Baltimore, MD*

- Introduced students to basic robotics and AI ideas through play-based group activities, keeping lessons engaging and interactive for different learning styles.

## Projects

**LinkinReachly (Open Source)** Apr. 2026 – Present
*TypeScript, CSS, JavaScript | GitHub*

- Fixed a bug in an Electron desktop app that automates LinkedIn job applications, in the Chrome DevTools Protocol (CDP) automation pipeline that handles LinkedIn's server-driven UI (SDUI) apply flow

**Honey Trail** Feb. 2025 – Present
*Python | GitHub*

- Built a campus navigation tool that uses Dijkstra's algorithm on weighted walking distances to find optimal routes between locations.
- Modeled campus locations as nodes and walking paths as weighted edges using an adjacency list for efficient graph representation.

**Nimbus** Apr. 2026 – Present
*JavaScript, HTML, CSS | GitHub*

- Developed an API-driven anime web application that fetches structured data from external RESTful APIs and dynamically renders images, descriptions, and UI components
- Designed a responsive front end for a smooth browsing experience across screen sizes

**The Cozy Cup** Jan. 2025 – Present
*HTML, CSS, PHP, SQL | GitHub*

- Built a responsive web application with PHP and a MySQL database, using HTML, CSS, and media queries for the user interface.
- Designed the MySQL schema with tables, relationships, and constraints to support application data flow.

## Extracurricular Activities

**CEAMLS (Jan. 2025 – Present):** Independently developed and taught Python lessons to K–5 students, simplifying coding concepts through interactive activities.
**SACS (Sept. 2024 – Present):** Support CS events and peer prep in resumes, LeetCode, and data structures.

## Technical Skills

**Languages:** Python, HTML, CSS, SQL, Java, JavaScript, TypeScript, PHP,
**Frameworks and Libraries:** Ruby on Rails, Pandas, Numpy, Matplotlib, RSpec, USWDS
**Tools and Platforms:** VS Code, GitHub, Git, Firebase, MySQL, MAMP
